August 10, 2009

Dear Symitar User:

Without 'touching ' your Symitar application you can now get all your SYMITAR reports delivered in Desktop friendly formats like EXCEL, WORD and PDF. Designed with the help of a SYMITAR user, byREQUEST® installs in less than an hour. This application is already running in SYMITAR shops like yours.

You don't need a fancy, expensive data warehouse to get great business reports and a money saving workflow from your SYMITAR reporting system.

Deploy our byREQUEST®/onHAND® solution and **SYMITAR reports that should be in EXCEL, arrive in EXCEL**…PDF and Word too…automatically. No filing, no paper, and no clutter.

With our system you immediately CRUSH the amount of time your staff spends dealing with SYMITAR business reports. We offer better reports and data in less time using less paper.

Don't want to make any changes to your current workflow in this business climate? We understand. We don't change any of your current operations. We simply slide byREQUEST® up 'next' to your Symitar application. When a Symitar report exits the Symitar application (right BEFORE it prints), byREQUEST® 'grabs' a copy. It's that simple.

SYMITAR users simply 'love' this solution. Why wouldn't they? They get all their SYMITAR reports as PDF, WORD, and EXCEL documents. Their SYMITAR data is immediately more valuable. There is no training. SYMITAR reports arrive in PC desktop friendly formats that can be used and understood immediately!

We've created a private web site especially for SYMITAR credit union users.
Browse to www.hillarysoftware.com/Symitar.
You'll find a complete review of both byREQUEST® and our onHAND® Symitar Business report server. byREQUEST® does the conversions and delivery. onHAND® is an optional virtual file cabinet.

This system was designed by a SYMITAR credit user just like you.

Invest 20 minutes in a private WEB discussion to find out more. No 'arm twisting', just a frank discussion. Email us at info@hillarysoftware.com with a convenient day and time and we'll confirm.

You'll think long and hard about reducing costs and improving your operations this year. This is an easy one.

Sincerely,

Hillary Software, Inc.
