

March 26, 2009

Dear SUMMIT User:

Our SUMMIT clients say 'love' is not too strong a word...

You don't need a fancy, expensive data warehouse to get great business reports and a money saving workflow from your SUMMIT system.

Deploy our byREQUEST[®]/onHAND[®] solution and **Summit reports that should be in EXCEL, arrive in EXCEL**...PDF and Word too...automatically. No filing, no paper, and no clutter.

With our system you immediately CRUSH the amount of time your staff spends dealing with SUMMIT business reports. We offer better decisions in less time using less paper.

Don't want to make any major changes to your current workflow in this business climate? We understand. The fact is, we've transitioned credit unions with staffs of 400 or more in less than a week...small credit unions in a matter of hours.

SUMMIT users simply 'love' this solution.

We've created a private web site especially for SUMMIT credit union users.

Browse to www.hillarysoftware.com/summit.

You'll find a complete review of our onHAND[®] Summit Business report server.

Now more than ever credit unions need to be talking to members, encouraging deposits NOT fumbling with business reports.

It's a tougher world out there. We understand your SUMMIT system.

Invest 20 minutes in a private WEB discussion. No 'arm twisting', just a frank discussion.

Email info@hillarysoftware.com with a convenient day and time and we'll confirm.

You'll think long and hard about reducing costs and improving your operations this year.

This is an easy one.

Sincerely,

Chuck Nickerson
